

## README

**IDE:** IntelliJ IDEA

**Languages:** Java/JSP/Servlets/maven/mysql

**DB:** MySQLWorkBench

**Server:** Oracle weblogic server 14.1.1

**Project:** DB\_CRUD (ContactsWebApp)

Compile the files as .war files(maven) and deploy it on the weblogic server.

Please provide Credentials as setup in own database.

Zip file contains both source code and already compiled and built .war files, which can be deployed on the server.
